Long-Term Care**

NOTICE OF PROPOSED REGULATION AMENDMENT

Personal Health Information Protection Act, 2004

The Minister of Health and Long-Term Care on behalf of the Government of Ontario invites public comments on a regulation amendment proposed to be made under the *Personal Health Information Protection Act, 2004* (PHIPA).

The Government is proposing an amendment to Ontario Regulation 329/04. The proposed regulation amendment will be posted for 45 days for public comment, after which the Minister reports to the Lieutenant Governor in Council, who may then finalize the regulation with or without changes.

Content of Proposed Regulation

The proposed regulation amendment would make the following changes to Ontario Regulation 329/04 of PHIPA:

- Add a new section 6.2 to Ontario Regulation 329/04 to clarify that eHealth Ontario can create and maintain Electronic Health Records as a service for Health Information Custodians when it is acting as a Health Information Network Provider for those Custodians under PHIPA.
- Define “creating or maintaining” Electronic Health Records as including the integration, management and servicing of those records. The regulation would describe two examples of such services: conducting data quality assurance tests on the personal health information provided by Health Information Custodians, and conducting analyses of that information in order to provide alerts and reminders to Health Information Custodians for their use in providing health care to their patients.
- Clarify that when personal health information is provided by Health Information Custodians to eHealth Ontario for the specific purpose of creating or maintaining Electronic Health Records, the Health Information Custodians would not be considered to be “disclosing” personal health information and eHealth Ontario would not be considered to be “collecting” that information from the Health Information Custodians, as those terms are defined under PHIPA.
- Require eHealth Ontario to put in place administrative, technical and physical safeguards, practices and procedures that have been reviewed by the Ontario Information and Privacy Commissioner, and to comply with detailed and specific privacy and security requirements when creating or maintaining Electronic Health Records.

This regulation amendment comes into force on the day it is filed.

This regulation amendment expires December 31, 2013.

Invitation to Provide Comments on Proposed Regulation

The public is invited to provide written comments on the proposed regulation over a 45-day period, **commencing on March 12, 2011 and ending on April 26, 2011.**

In providing comments, please consider whether the proposed amendment to Regulation 329/04 should be made, with or without changes. Please be as specific as possible, and provide a full rationale for any suggested changes.

Avis du ministre de la Santé et des Soins de longue durée

AVIS DE PROJET DE MODIFICATION DE RÈGLEMENT

Loi de 2004 sur la protection des renseignements personnels sur la santé

Au nom du gouvernement de l'Ontario, le ministre de la Santé et des Soins de longue durée invite le public à présenter des commentaires sur un projet de modification de règlement en application de la *Loi de 2004 sur la protection des renseignements personnels sur la santé* (LPRPS).

Le projet de modification du gouvernement modifierait le Règlement de l'Ontario 329/04. Le projet de modification de règlement sera affiché aux fins des commentaires du public pendant 45 jours, après quoi le Ministre fera rapport au lieutenant-gouverneur en conseil, qui pourra alors sanctionner le règlement avec ou sans changements.

Contenu du projet de règlement

Le projet de modification de règlement prévoit d'apporter les changements suivants au Règlement de l'Ontario 329/04 pris en application de la LPRPS :

- Ajouter un article 6.2 au Règlement de l'Ontario 329/04 pour préciser que Cybersanté Ontario peut fournir aux dépositaires de renseignements sur la santé un service consistant à créer et à maintenir des dossiers de santé électroniques, quand Cybersanté Ontario fait office de fournisseur d'un réseau d'information sur la santé pour ces dépositaires en vertu de la LPRPS.
- Inclure dans la définition de « créer ou maintenir » des dossiers de santé électroniques l'intégration, la gestion et le soutien de tels dossiers. Le règlement

donnerait deux exemples de tels services : soumettre à des essais d'assurance de la qualité les renseignements personnels sur la santé fournis par les dépositaires de renseignements sur la santé, et effectuer des analyses de ces renseignements pour fournir aux dépositaires de renseignements sur la santé des alertes et des rappels qu'ils pourraient utiliser dans la fourniture de soins de santé à leurs patients.

- Préciser que la fourniture de renseignements personnels sur la santé par les dépositaires de renseignements sur la santé à Cybersanté Ontario expressément aux fins de la création ou du maintien de dossiers de santé électroniques ne serait pas considérée comme une « divulgation » de renseignements personnels sur la santé par les dépositaires de renseignements sur la santé, ni comme une « collecte » d'information par Cybersanté Ontario auprès des dépositaires de renseignements sur la santé, selon les définitions données à ces termes dans la LPRPS.
- Exiger que Cybersanté Ontario mette en place des mesures de précaution, des pratiques et des procédures d'ordre administratif, technique et physique que le commissaire à l'information et à la protection de la vie privée de l'Ontario a examinées, et se conforme à des exigences détaillées et précises en matière de protection de la vie privée et de sécurité, aux fins de la création et du maintien de dossiers de santé électroniques.

La présente modification de règlement entre en vigueur le jour de son dépôt.

Le présent règlement expire le 31 décembre 2013.

Invitation à présenter des commentaires sur le projet de règlement

Le public est invité à présenter des commentaires écrits sur le projet de règlement dans un délai de 45 jours, soit du **12 mars 2011 au 26 avril 2011**.

Dans vos commentaires, veuillez indiquer s'il faut apporter au Règlement de l'Ontario 329/04 les modifications proposées dans leur version originale ou modifiée. Soyez le plus précis possible et justifiez en détail toute modification ou tout ajout proposé.

5. In the contract for the provision of the supply, the purchaser has agreed,
 - i. to the operator storing or arranging the storage of the supply, and
 - ii. to treat the supply, for the purposes of section 44 of the Act and section 81 of this Regulation, as being provided at the time the supply is placed in storage.
6. The contract does not require that the purchaser be responsible for the costs relating to the storage or insuring of the supply.

(4) An operator who, under section 39 of the Act, agrees to store a supply, or arrange for a supply to be stored by another person, shall not store the supply, or have it stored by another person, within the 30 days after the day the contract for the provision of the supply is made.

(5) An operator who, under section 39 of the Act, agrees to store a supply, or arrange for a supply to be stored by another person, shall ensure that,

(3) If an operator receives written notice of cancellation from a purchaser under subsection 41 (1) of the Act after having provided to the purchaser some or all of the licensed supplies under the contract, the operator shall give the purchaser forthwith a written notice setting out,

- (a) the purchaser's obligation under subsection 41 (5) of the Act and subsection 138 (3) of this Regulation to take reasonable care of the supplies; and
- (b) the effect, set out in subsection (2), that the purchaser's failure to comply with the obligation mentioned in clause (a) will have on the purchaser's right to a refund under subsection 41 (2) of the Act.

Cancellation of unenforceable contract, purchaser's obligations

138. (1) For the purposes of subsection 41 (4) of the Act, if a purchaser cancels a contract under subsection 41 (1) of the Act after licensed supplies have been delivered to the purchaser under the contract,

- (2) The purchaser shall perform the purchaser's obligations under subsection 41 (4) of the Act, read subject to subsection (1) of this section,

(3) When making the refund mentioned in subsection (2), the operator shall give the purchaser orally or, if requested, in writing, an itemized list of all expenses deducted under that subsection, including amounts deducted for work done by the operator and amounts deducted for payments made or debts incurred by the operator to third parties, and the list shall set out, for each expense, its purpose, and its amount.

(4) A purchaser may withdraw a request described in subsection (1) by giving the operator a written notice of the withdrawal that meets the following requirements:

2. It shall set out,
 - i. the date of the contract,

2. The income that would have been earned on the money had it been deposited as required under the Act and the regulations.

(2) If a purchaser cancels a contract under subsection 44 (1) of the Act, in calculating the refund to be made to the purchaser, the operator may, in addition to deducting under clause 44 (4) (b) of the Act the value of any supplies and services that have been provided, deduct under clause 44 (4) (a) of the Act the lesser of the following amounts less the amount that the operator has retained under subsection 78 (1) as not being prepaid trust money, if the balance is positive:

1. 10 per cent of the sum of the money received by the operator under the contract and the additional amounts that the operator is required to refund to the purchaser as determined under subsection (1).

(1) If an interment rights holder or a scattering rights holder cancels a contract under subsection 47 (5) of the Act, the amount that the operator may deduct under subsection 47 (6) of the Act in calculating the payment to be made to the rights holder under that subsection is the amount of the operator's contribution to the cemetery's care and maintenance fund under section 87 of this Regulation in connection with the sale of such rights under the contract being cancelled.

(2) For the purposes of clause 47 (7) (b) of the Act, if the price for the interment rights or scattering rights is not set out on the operator's price list, their market value mentioned in paragraph 2 of subsection 47 (6) of the Act shall be deemed to be equal to the market value of interment rights or scattering rights, as the case may be, with respect to a lot that,

- (a) is equivalent to or better than the lot in respect of which the rights holder purchased the rights under the contract; and

PART I

GROUND STAKING OF MINING CLAIMS

GENERAL RULES

Ground staking

2. (1) A mining claim is ground staked by erecting a corner post at each of the four corners of the claim so that,

- (a) the No. 1 corner post is at the northeast corner;
- (b) the No. 2 corner post is at the southeast corner;
- (c) the No. 3 corner post is at the southwest corner; and
- (d) the No. 4 corner post is at the northwest corner.

(2) A corner post tag affixed to a corner post must face the next post following the corner post in the order set out in subsection (1).

(3) If there are standing trees on the perimeter of the area being ground staked, the perimeter of the mining claim must be clearly marked during staking by plainly blazing the trees on two sides only in the direction of travel and by cutting the underbrush along the boundaries of the claim.

(4) If there are no standing trees on the perimeter of the area being ground staked, the perimeter of the mining claim must be clearly marked during staking by erecting durable pickets or monuments of earth or rock along the boundaries of the claim.

(5) Subsection (4) does not apply where an irregular claim boundary that is a water-to-land boundary is intended to be coterminous with land, or land under water, that is not open for staking.

Same, rules re boundaries

3. The following rules apply to ground staking of mining claims:

1. The boundaries of the claim extend downwards vertically.
2. No boundary of the claim can exceed 3,200 metres in length, nor can any one boundary be more than four times the length of any other boundary of the claim.
3. The measurements of the boundaries of a mining claim are horizontal distances.

Same, recording licensee

4. (1) A ground staked mining claim must be staked under the direction of a recording licensee.

(2) In order to direct the ground staking of a mining claim under subsection (1), the recording licensee must be present in each area under staking for a mining claim at the time the area is being staked for the purpose of recording the mining claim.

(3) The recording licensee must direct other licensees as well as non-licensees in constructing claim posts and marking the perimeter of a mining claim.

Same, rules

5. (1) The following rules apply to the ground staking of a mining claim in areas that have been open for staking for 24 hours or more:

1. The staking may be started at any corner or line post.
2. Only the recording licensee or another licensee may erect, inscribe or affix a tag to a corner post, line post or witness post.
3. The date and time of completion of the ground staking must be inscribed on one of the corner posts after all of the required work of staking the claim has been completed.

(2) The following rules apply to the ground staking of a mining claim in areas that have been open for staking for less than 24 hours:

1. The staking must start at the northeast corner of the mining claim and proceed in a clockwise direction.
2. Only the recording licensee may erect, inscribe or affix a tag to a corner post, line post or witness post.
3. The date and time of both the start and completion of the staking must be inscribed on the No. 1 corner post by the recording licensee.

Same, land not open for staking

6. (1) The ground staking of a mining claim is not invalidated for the sole reason that it encompasses land that is not open for staking unless the land encompassed in the claim constitutes an unpatented mining claim recorded prior to the time of the staking.

(2) Land that is not open for staking that is encompassed in a valid mining claim does not form part of the area of the mining claim.

(3) Land that is not open for staking that is wholly encompassed in a valid mining claim is not required to be marked out.

Witness posts

7. (1) One or two witness posts, instead of a corner post, must be erected in accordance with this section for a corner of a ground staked mining claim at which it is impracticable to erect a corner post for one of the following reasons:

1. The nature or conformation of the ground at the true corner makes the erecting of a corner post impracticable.
2. The true corner falls within a body of water.

3. The true corner is inaccessible because of incumbent surface rights.
- (2) Witness posts must be erected on the claim boundary as close to the true corner as practicable.
- (3) Witness posts must bear,
 - (a) the same inscription and tag as are required for a corner post at a true corner under subsection 10 (1) or (3);
 - (b) the letters "WP"; and
 - (c) an indication of the direction and distance of the true corner from the witness post.
- (4) If a second witness post is erected, it must bear,
 - (a) the letters "WP";
 - (b) the corner post number for the true corner;
 - (c) the claim number; and
 - (d) an indication of the direction and distance of the true corner from the witness post.
- (5) A second witness post may bear the same inscription as is required for a corner post at a true corner under subsection 10 (1) or (3).
- (6) It is not necessary to erect a second witness post for a corner if it is impracticable to do so.

Line posts

8. (1) If the nature or conformation of the ground at a particular location, incumbent surface rights or water is an obstacle that makes the erecting of a line post at that location impracticable, a line post must be erected on each side of the obstacle.
- (2) If a ground staked mining claim being staked is coterminous with land not open for staking and the boundary of the land not open for staking changes direction other than at a corner of the claim, a line post must be erected at the point of change of direction.
- (3) A line post tag inscribed with the claim number and the direction and distance from the last corner post erected must be affixed to the line post.

Claim posts

9. (1) Every claim post used for ground staking a mining claim must,
 - (a) stand 1.2 metres above the ground when erected;
 - (b) be squared or faced on four sides for 30 centimetres from the top; and
 - (c) be squared or faced for 10 centimetres across each side.
- (2) Only a post or a standing stump not previously used for staking a mining claim may be used as a claim post.
- (3) Commercial timber may be used for claim posts in areas where it is impracticable or undesirable to cut down trees.

Tags and inscriptions

10. (1) A licensee ground staking a claim using metal tags must affix to each corner post the appropriately numbered tag and inscribe on each such post his or her name and licence number and the date and time of erecting the post.
- (2) A licensee ground staking a claim using metal tags must inscribe on the line post tag attached to each line post the claim number, the corner post number, the direction of the corner post from which the licensee is proceeding and the distance from the line post to that corner post.
- (3) A licensee ground staking a claim without using metal tags must inscribe on each corner post the number of the post, his or her name and licence number and the date and time of erecting the post.
- (4) A licensee ground staking a claim without using metal tags must inscribe on each line post his or her licence number, the corner post number, the direction of the corner post from which the licensee is proceeding and the distance from the line post to that corner post.
- (5) Inscriptions and line post tags on line posts must be located,
 - (a) on the south face of any line post erected between the No. 1 corner post and the No. 2 corner post;
 - (b) on the west face of any line post erected between the No. 2 corner post and the No. 3 corner post;
 - (c) on the north face of any line post erected between the No. 3 corner post and the No. 4 corner post; and
 - (d) on the east face of any line post erected between the No. 4 corner post and the No. 1 corner post.
- (6) Information required to be inscribed on a claim post or metal tag must be inscribed in a legible and durable manner.

(7) Inscriptions and metal tags must be located on the same side of a claim post.

Indication of metal tags, post tags

11. (1) If metal tags are affixed to corner posts and line posts at the time of ground staking a mining claim, the licensee who staked the claim must so indicate in the application to record the claim.

(2) If metal tags are not used at the time of ground staking a mining claim, the holder of the claim must affix, as soon as possible after the recording of the claim but not later than six months after recording,

- (a) to each corner post, a corner post tag inscribed with the recorded number of the claim; and
- (b) to each line post, a line post tag inscribed with his or her licence number, the claim number, the corner post number, the direction of the corner post last erected and the distance from the line post to that corner post.

Common staking contiguous claims

12. (1) If a licensee ground stakes two or more contiguous mining claims and the licensee applies to record the claims at the same time, the licensee may erect common corner posts at common corners or, where applicable, common witness posts to witness common corners, and common line and corner posts at common line and corner post locations.

(2) If a common corner post is erected under subsection (1), the corner post tag, if metal tags are used, and any required inscriptions pertaining to each claim must be placed on the side of the common corner post facing the next corner post for that claim in a clockwise manner.

(3) If a common witness post is erected under subsection (1), the witness post tag, if metal tags are used, and the inscription pertaining to each claim must be placed on the side of the common witness post facing the next corner post for that claim in a clockwise manner.

(4) If a common line post is erected under subsection (1), the line post tag, if metal tags are used, and any required inscriptions pertaining to each claim must be placed on the side of the common line post facing the next corner post for that claim in a clockwise manner.

(5) The sketch or plan included in the application to record the claims referred to in subsection (1) must indicate the location of any common claim posts.

Failing to record a mining claim

13. A person who ground stakes land open for staking and fails to apply to record the mining claim within the time set out in subsection 44 (1) of the Act is not entitled to have a mining claim recorded on the land or to stake the land again, and a mining recorder may refuse or cancel any such staking.

Good faith claim not invalidated

14. If it appears that a licensee has attempted, in good faith, to comply with the Act and this Regulation, a ground staked mining claim of the licensee is not invalidated by,

- (a) the inclusion in the area of the claim of an area of more or less than the applicable size; or
- (b) the licensee's failure to describe or set out the actual area or parcel of land ground staked in the application to record the claim or in the sketch or plan accompanying the application.

SPECIFIC RULES: UNSUBDIVIDED TERRITORY

Claim in unsubdivided territory

15. (1) Subject to subsections (2) and (3), a mining claim in unsubdivided territory must be ground staked so that it,

- (a) consists of one or more claim units;
- (b) has a contiguous area of not less than 16 hectares and not more than 256 hectares;
- (c) has boundaries running only north and south and east and west astronomically; and
- (d) has the form of a square or rectangle.

(2) A mining claim may have a boundary that is coterminous with the boundary of an area that is not open for staking as long as all other boundaries of the claim are staked so that the claim conforms as closely as possible to the requirements set out in subsection (1).

(3) A boundary of a mining claim may change direction where it is coterminous with land not open for staking, at an intersection of an existing survey or claim boundary, at a claim post or at a monument of adjacent land or existing township fabric.

(4) If a mining claim consists of two or more claim units, line posts must be erected along the perimeter of the claim at 400 metre intervals.

(5) The size of a mining claim must, as nearly as practicable, be a multiple of 16 hectares except if the claim comprises an irregular area of land described in section 16.

(6) The measurements of the boundaries of a mining claim are horizontal distances.

Exception, staking irregular area

16. (1) An irregular area of land lying adjacent to land, or to land under water, that is not open for staking may be ground staked with boundaries coterminous to the land, or land under water, that is not open for staking if the mining claim otherwise conforms, as nearly as practicable, to all the requirements set out in section 3, except paragraph 2, and section 15.

(2) An irregular area of land under water lying adjacent to land, or to land under water, that is not open for staking may be ground staked with boundaries coterminous to the land, or land under water, that is not open for staking if the mining claim otherwise conforms, as nearly as practicable, to all the requirements set out in section 3, except paragraph 2, and section 15.

(3) The boundaries of an irregular claim staked under subsection (1) or (2) must be marked by the erection of line posts along them at 400 metre intervals.

(4) Despite subsection (3), the erection of line posts is not required along an irregular claim boundary that is a water boundary.

(5) An irregular ground staked claim boundary that is a water boundary need only be marked by the erection of corner posts along the boundary line as close as practicable to where the claim boundary meets the water boundary.

(6) In subsections (4) and (5),

“water boundary” means the water’s edge, unless otherwise defined in the existing alienation.

Application to designated subdivided territory

17. In addition to applying to the ground staking of mining claims in unsubdivided territory, sections 15 and 16 apply to the ground staking of mining claims in areas of subdivided territory designated by the Minister if, in the Minister’s opinion, the survey fabric in those areas is so difficult to ascertain that it is not reasonable to expect a person ground staking a claim there to do so in accordance with sections 18, 19 and 20.

SPECIFIC RULES: SUBDIVIDED TERRITORY

Ground staking in subdivided territory

18. (1) A ground staked mining claim in subdivided territory must have boundaries coincident with or parallel to section, lot, concession or range lines established by the original survey.

(2) A ground staked mining claim must have an area of not more than 256 hectares and not less than the minimum size set out in this section.

(3) A ground staked mining claim must have the shape of a square or rectangle.

(4) A ground staked mining claim may have a boundary that is coterminous with the boundary of an area that is not open for staking as long as all other boundaries of the claim are staked so that the claim conforms as closely as possible to the requirements set out in this section and section 3, except paragraph 2.

(5) If the ground staked mining claim consists of two or more claim units, line posts must be erected along the perimeter of the claim at all locations where the corner of a lot or of a subdivision of a section lies on the perimeter of the claim.

(6) Where irregular boundaries exist, the line posts must be erected to mark out the boundaries as nearly as practicable.

(7) In a township subdivided into lots of 40 hectares, a ground staked mining claim of minimum size must contain 20 hectares and consist of the north, south, east or west half of a lot.

(8) In a township subdivided into lots of 60 hectares, a ground staked mining claim of minimum size must contain 15 hectares and consist of the northeast, northwest, southeast or southwest quarter of a lot.

(9) In a township subdivided into lots of 80 hectares, a ground staked mining claim of minimum size must contain 20 hectares and consist of the northeast, northwest, southeast or southwest quarter of a lot.

(10) In a township subdivided into lots of 130 hectares, a ground staked mining claim of minimum size must consist of the northeast, northwest, southeast or southwest quarter of the north or south half of a lot.

(11) In a township subdivided into sections of 260 hectares that are subdivided into quarter sections or subdivisions containing 65 hectares, a ground staked mining claim of minimum size must consist of the northeast, northwest, southeast or southwest quarter of a quarter section or subdivision.

Exception

19. A ground staked mining claim in subdivided territory is not required to comply with section 18 if,

(a) compliance is not possible,

- (i) because the lot or subdivision of a section of a township is irregular in form, or
- (ii) because of any other irregularity affecting the original survey, the lot or subdivision; and
- (b) the claim is otherwise staked so as to meet the requirements of section 18 as closely as practicable in the circumstances.

Including otherwise excluded land in mining claim

20. Land that would otherwise be included in the area of a lot or subdivision of a section, but that is excluded from the lot or subdivision because it is covered with water or for some other reason, may be included in a ground staked mining claim as if it were part of the lot or subdivision.

**PART II
MAP STAKING OF MINING CLAIMS**

MAP STAKING IN SOUTHERN ONTARIO

Map staking in Southern Ontario

21. (1) In subdivided territory in Southern Ontario, map staking of mining claims shall be done in accordance with this Part, by reference to the existing survey fabric.

(2) In unsubdivided territory in Southern Ontario, mining claims shall be ground staked in accordance with Part III.

Prohibition, ground staking etc.,

22. No mining claim in subdivided territory in Southern Ontario shall be ground staked and no application to record a ground staked mining claim in the territory shall be accepted for recording on and after the effective date when map staking of mining claims is applicable to the territory.

Territory excluded from map staking

23. (1) A mining claim that is map staked shall not include land that is in territory where map staking is not permitted.

(2) Where a map staked mining claim is limited in size due to subsection (1), the minimum size requirements for a map staked mining claim do not apply.

Completion of staking

24. Completion of staking in the case of a map staked mining claim occurs when the application to record a map staked mining claim is made in the manner set out in this Regulation and any required fee is paid.

Aliquot description of claim

25. (1) The application to record a map staked mining claim must include an aliquot description of the claim with reference to the original survey fabric as well as a sketch of the claim.

(2) Where there is a discrepancy between the aliquot description and the sketch, the sketch prevails as the correct description of the intended map staked mining claim.

Application to record map staked claim

26. (1) Subject to section 31, the application to record a map staked mining claim may be made by facsimile, mail or in person to the Provincial Recording Office or to any other office as may be designated by the Minister.

(2) For purposes of section 44 of the Act, the staking of a map staked mining claim is simultaneous with making the application to record a map staked claim.

Claim boundaries, size and orientation

27. (1) A map staked mining claim must have boundaries coincident with or parallel to section, lot, concession or range lines established by the original survey.

(2) A map staked mining claim must be comprised of various aliquot parts of lots, and each aliquot part must have at least one common boundary with another aliquot part within the same claim.

(3) A map staked mining claim must have an area not greater than 256 hectares and not less than the minimum area set out in this section.

(4) In a township subdivided into lots of 40 hectares, a map staked mining claim of minimum size must contain 20 hectares and consist of the north, south, east or west half of a lot.

(5) In a township subdivided into lots of 60 hectares, a map staked mining claim of minimum size must contain 15 hectares and consist of the northeast, northwest, southeast or southwest quarter of a lot.

(6) In a township subdivided into lots of 80 hectares, a map staked mining claim of minimum size must contain 20 hectares and consist of the northeast, northwest, southeast or southwest quarter of a lot.

(7) In a township subdivided into lots of 130 hectares, a map staked mining claim of minimum size must consist of the northeast, northwest, southeast or southwest quarter of the north or south half of a lot.

(8) In a township subdivided into sections of 260 hectares that are subdivided into quarter sections or subdivisions containing 65 hectares, a map staked mining claim of minimum size must consist of the northeast, northwest, southeast or southwest quarter of a quarter section or subdivision.

Exception

28. A map staked mining claim is not required to comply with section 27, if

- (a) compliance is not possible,
 - (i) because the lot or subdivision of a section of a township is irregular in form, or
 - (ii) because of any other irregularity affecting the original survey, the lot or subdivision; and
- (b) the claim is otherwise staked so as to meet the requirements of section 27 as closely as practicable in the circumstances.

Boundary coterminous with boundary of area not open for staking

29. A map staked mining claim may have a boundary that is coterminous with the boundary of an area that is not open for staking as long as all other boundaries of the claim are staked so that the claim conforms as closely as possible to the requirements set out in section 27.

Including otherwise excluded land in mining claim

30. Land that would otherwise be included in the area of a lot or subdivision of a section, but that is excluded from the lot or subdivision because it is covered with water or for some other reason may be included in a map staked mining claim as if it were part of the lot or subdivision.

Rules re area open for staking for less than one business day

31. The following rules apply to the map staking of a mining claim in areas that have been open for map staking for less than one business day:

1. The application to record a map staked claim can only be made to the Provincial Recording Office by facsimile (fax) at the fax number designated by the Provincial Recording office.
2. Only one application to record a map staked mining claim can be made in a single fax transmission.
3. The time imprinted on the first page of a fax transmission for an application to record a map staked mining claim by the receiving fax machine in the Provincial Recording Office, shall be the time of commencement of staking for a map staked mining claim.
4. The time imprinted on the last page of a fax transmission for an application to record a map staked mining claim by the receiving fax machine in the Provincial Recording Office, shall be the time of making the application to record a map staked mining claim.
5. Map staking of a mining claim is completed when the application to record a map staked mining claim has been made and payment of any required fee for the application has been made.
6. Map staking of a mining claim must be completed by 4:30 p.m. local time at the Provincial Recording Office on the first business day that the lands are open for staking.
7. If the fax transmission of an application to record a map staked mining claim is completed in the Provincial Recording Office after 4:30 p.m. local time on a day the Provincial Recording Office is open for business, or at any time on a day that the Provincial Recording Office is not open for business, the application to record is deemed to be made at 8:30 on the next day the Provincial Recording Office is open for business.
8. If more than one application to record a map staked mining claim for the same lands is made by fax transmission in the circumstances set out in paragraph 7, the applications to record are deemed to have been made on the next day that the Provincial Recording Office is open for business in the order they were received in the Provincial Recording Office, as evidenced by the time imprinted on the last page of each fax transmission by the receiving fax machine in the Provincial Recording Office.

PART III GROUND STAKING OF MINING CLAIMS IN DESIGNATED AREAS

Special staking in designated areas

32. Ground staking of mining claims in unsubdivided territory in Southern Ontario and in other areas as may be designated by the Minister shall be carried out in accordance with the provisions of this Regulation applicable to ground staking, subject to the following modifications:

1. Despite subsection 2 (3), if there are standing trees in the area that is being ground staked, trees on the perimeter of that area must not be blazed, and the perimeter must be clearly marked by securely affixing durable flagging tape to the trees or by painting them on two sides in the direction of travel.
2. If there are standing trees in the area being ground staked, the perimeter of the area being staked must not be marked by the cutting of underbrush.
3. Flagging, painting, pickets or monuments must not be used to mark the shoreline perimeter of an area being ground staked.
4. Witness posts, claim posts and line posts must be set back from the shoreline perimeter of an area being ground staked so that they cannot be seen from the water.
5. Standing trees of any type in the area being ground staked must not be cut, pruned or delimbed for staking purposes.
6. There must be no claim posts, witness posts, line posts, line blazing or any other evidence of ground staking on islands.

PART IV MATTERS RELATED TO RECORDING OF MINING CLAIMS

Notice to surface rights owner

33. (1) Notice of confirmation of staking to the surface rights owner pursuant to section 46.1 of the Act shall be given in person, by regular mail or by courier with proof of delivery, to the last known address of the surface rights owner.

(2) If the notice of confirmation of staking is given by regular mail, it is deemed to have been received five days after the mailing date.

(3) If the licensee who staked the claim is a surface rights owner of the claim, notice of confirmation of staking is not required.

(4) Proof that the required notice confirmation of staking has been given shall be given by filing the required form at the Provincial Recording Office.

PART V TRANSITION, REVOCATIONS AND COMMENCEMENT

Transition

- (b) otherwise meets the requirements in the Act and regulations for staking and recording.

(2) Despite anything in the Act, for a period of 60 days following the date when map staking is permitted in Southern Ontario, no map staked claim shall be accepted for recording by a mining recorder.

PARTIE I JALONNEMENT AU SOL DES CLAIMS

RÈGLES GÉNÉRALES

Jalonnement au sol

2. (1) Un claim est jalonné au sol par l'érection d'un poteau d'angle à chacun de ses quatre angles de sorte que :

- a) le poteau d'angle n° 1 se trouve à l'angle nord-est;
- b) le poteau d'angle n° 2 se trouve à l'angle sud-est;
- c) le poteau d'angle n° 3 se trouve à l'angle sud-ouest;
- d) le poteau d'angle n° 4 se trouve à l'angle nord-ouest.

(2) L'étiquette qui est fixée au poteau d'angle fait face au poteau d'angle suivant dans l'ordre énoncé au paragraphe (1).

(3) S'il y a des arbres sur pied sur le périmètre du secteur faisant l'objet du jalonnement au sol, le périmètre du claim est indiqué clairement pendant le jalonnement en pratiquant des encoches apparentes sur les arbres sur deux côtés seulement dans la direction du déplacement et en coupant les broussailles le long des limites du claim.

(4) S'il n'y a pas d'arbres sur pied sur le périmètre du secteur faisant l'objet du jalonnement au sol, le périmètre du claim est indiqué clairement pendant le jalonnement en plantant des piquets résistants ou en dressant des monticules de terre ou de pierres le long des limites du claim.

(5) Le paragraphe (4) ne s'applique pas s'il est prévu qu'une limite irrégulière de claim qui est une limite de littoral sera commune à un terrain, submergé ou non, non ouvert au jalonnement.

Idem : règles concernant les limites

3. Les règles suivantes s'appliquent au jalonnement au sol des claims :

- 1. Les limites d'un claim descendent verticalement dans le sol.
- 2. Nulle limite de claim ne doit dépasser 3 200 mètres de long, ni quatre fois la longueur d'une autre limite.

3. Les limites d'un claim sont mesurées horizontalement.

Idem : titulaire de permis qui demande l'enregistrement

4. (1) Un claim jalonné au sol est jalonné sous la supervision du titulaire de permis qui demande l'enregistrement.

(2) Afin de superviser le jalonnement au sol d'un claim aux termes du paragraphe (1), le titulaire de permis qui demande l'enregistrement doit être présent dans chaque secteur faisant l'objet du jalonnement d'un claim pendant que s'y déroule le jalonnement en vue d'enregistrer le claim.

(3) Le titulaire de permis qui demande l'enregistrement supervise les personnes, titulaires de permis ou non, qui fabriquent les poteaux de claim et indiquent le périmètre du claim.

Idem : règles

5. (1) Les règles suivantes s'appliquent au jalonnement au sol de claims dans des secteurs qui sont ouverts au jalonnement depuis 24 heures ou plus :

1. Le jalonnement peut commencer à n'importe quel poteau d'angle ou poteau de ligne de démarcation.
2. Seul le titulaire de permis qui demande l'enregistrement ou un autre titulaire de permis peut ériger un poteau d'angle, un poteau de ligne de démarcation ou un poteau indicateur, porter une inscription sur ces poteaux ou y fixer une étiquette.
3. La date et l'heure d'achèvement du jalonnement au sol sont inscrites sur l'un des poteaux d'angle une fois achevés tous les travaux requis pour le jalonnement du claim.

(2) Les règles suivantes s'appliquent au jalonnement au sol de claims dans des secteurs qui sont ouverts au jalonnement depuis moins de 24 heures :

1. Le jalonnement commence à l'angle nord-est du claim et se poursuit dans le sens des aiguilles d'une montre.
2. Seul le titulaire de permis qui demande l'enregistrement peut ériger un poteau d'angle, un poteau de ligne de démarcation ou un poteau indicateur, porter une inscription sur ces poteaux ou y fixer une étiquette.
3. Le titulaire de permis qui demande l'enregistrement inscrit la date et l'heure de commencement et d'achèvement du jalonnement sur le poteau d'angle n° 1.

Idem : terrain non ouvert au jalonnement

6. (1) Le jalonnement au sol d'un claim n'est pas invalidé pour le seul motif qu'il comprend un terrain non ouvert au jalonnement, à moins que le terrain en question ne constitue un claim non concédé par lettres patentes enregistré avant le moment du jalonnement.

(2) Le terrain non ouvert au jalonnement qui est compris dans un claim valide ne fait pas partie de la superficie du claim.

(3) Il n'est pas nécessaire d'indiquer les limites d'un terrain non ouvert au jalonnement qui est entièrement compris dans un claim valide.

Poteaux indicateurs

7. (1) Un ou deux poteaux indicateurs sont érigés conformément au présent article, au lieu d'un poteau d'angle, pour indiquer l'angle d'un claim jalonné au sol où il est pratiquement impossible d'ériger un poteau d'angle pour l'une des raisons suivantes :

1. La nature ou la configuration du sol à l'angle réel rend pratiquement impossible l'érection d'un poteau d'angle.
2. L'angle réel est immergé.
3. L'angle réel est inaccessible en raison de l'existence de droits de surface.

(2) Les poteaux indicateurs sont érigés sur la limite de claim le plus près possible de l'angle réel.

(3) Les poteaux indicateurs portent :

- a) la même inscription et la même étiquette que celles exigées pour un poteau d'angle érigé à un angle réel aux termes du paragraphe 10 (1) ou (3);
- b) les lettres «WP»;
- c) l'indication de la direction et de la distance de l'angle réel à partir du poteau indicateur concerné.

(4) Si un deuxième poteau indicateur est érigé, il porte :

- a) les lettres «WP»;
- b) le numéro du poteau d'angle pour l'angle réel;
- c) le numéro du claim;

d) l'indication de la direction et de la distance de l'angle réel à partir de ce poteau indicateur.

(5) Le deuxième poteau indicateur peut porter la même inscription que celle exigée pour un poteau d'angle érigé à un angle réel aux termes du paragraphe 10 (1) ou (3).

(6) Il n'est pas nécessaire d'ériger un deuxième poteau indicateur pour indiquer un angle s'il est pratiquement impossible de le faire.

Poteaux de ligne

8. (1) Si la nature ou la configuration du sol à un endroit particulier, ou l'existence de droits de surface ou d'une étendue d'eau est un obstacle qui rend pratiquement impossible l'érection d'un poteau de ligne de démarcation à cet endroit, un poteau de ligne de démarcation est érigé de chaque côté de l'obstacle.

(2) Si un claim jalonné au sol qui fait l'objet d'un jalonnement est commun à un terrain non ouvert au jalonnement et que la limite de ce terrain change de direction ailleurs qu'à un angle du claim, un poteau de ligne de démarcation est érigé à l'endroit où la direction change.

(3) Est fixée au poteau de ligne de démarcation une étiquette sur laquelle sont inscrits le numéro du claim, la direction suivie à partir du dernier poteau d'angle érigé et la distance entre les deux poteaux.

Poteaux de claim

9. (1) Les poteaux de claim servant au jalonnement au sol d'un claim :

- a) s'élèvent à 1,2 mètre du sol une fois érigés;
- b) sont équarris ou parés sur les quatre côtés sur une longueur de 30 centimètres à partir du sommet;
- c) sont équarris ou parés de chaque côté sur une largeur de 10 centimètres.

(2) Seuls les poteaux ou les souches sur pied n'ayant jamais servi au jalonnement d'un claim peuvent servir de poteaux de claim.

(3) Dans les secteurs où il est pratiquement impossible ou non souhaitable d'abattre des arbres, les poteaux de claim peuvent être faits de bois commercial.

Étiquettes et inscriptions

10. (1) Le titulaire de permis qui jalonne un claim au sol au moyen d'étiquettes métalliques fixe à chaque poteau d'angle l'étiquette numérotée appropriée et inscrit sur chacun de ces poteaux son nom et son numéro de permis ainsi que la date et l'heure auxquelles le poteau a été érigé.

(2) Le titulaire de permis qui jalonne un claim au sol au moyen d'étiquettes métalliques inscrit sur l'étiquette fixée à chaque poteau de ligne de démarcation le numéro du claim, le numéro du poteau d'angle, la direction du poteau d'angle servant de point de départ au titulaire et la distance entre le poteau de ligne de démarcation et ce poteau d'angle.

(3) Le titulaire de permis qui jalonne un claim au sol sans utiliser d'étiquettes métalliques inscrit sur chaque poteau d'angle le numéro du poteau, son nom et son numéro de permis ainsi que la date et l'heure auxquelles le poteau a été érigé.

(4) Le titulaire de permis qui jalonne un claim au sol sans utiliser d'étiquettes métalliques inscrit sur chaque poteau de ligne de démarcation son numéro de permis, le numéro du poteau d'angle, la direction du poteau d'angle servant de point de départ au titulaire et la distance entre le poteau de ligne de démarcation et ce poteau d'angle.

(5) Les inscriptions portées sur les poteaux de ligne de démarcation et les étiquettes qui y sont fixées sont placées comme suit :

- a) sur la face sud de tout poteau de ligne de démarcation érigé entre les poteaux d'angle n^{os} 1 et 2;
 - b) sur la face ouest de tout poteau de ligne de démarcation érigé entre les poteaux d'angle n^{os} 2 et 3;
 - c) sur la face nord de tout poteau de ligne de démarcation érigé entre les poteaux d'angle n^{os} 3 et 4;
 - d) sur la face est de tout poteau de ligne de démarcation érigé entre les poteaux d'angle n^{os} 4 et 1.
- (6) Les inscriptions à porter sur un poteau de claim ou une étiquette métallique doivent être lisibles et durables.
- (7) Les inscriptions et les étiquettes métalliques sont placées sur le même côté du poteau de claim.

Mention des étiquettes métalliques

11. (1) Si des étiquettes métalliques sont fixées aux poteaux d'angle et aux poteaux de ligne de démarcation au moment du jalonnement au sol d'un claim, le titulaire de permis qui a jalonné celui-ci le mentionne dans sa demande d'enregistrement du claim.

(2) Si aucune étiquette métallique n'est utilisée au moment du jalonnement au sol d'un claim, dès que possible après l'enregistrement de celui-ci, mais au plus tard dans les six mois, le titulaire du claim fixe :

- a) d'une part, à chaque poteau d'angle, une étiquette sur laquelle est inscrit le numéro d'enregistrement du claim;
- b) d'autre part, à chaque poteau de ligne de démarcation, une étiquette sur laquelle sont inscrits son numéro de permis, le numéro du claim, le numéro du poteau d'angle, la direction du dernier poteau d'angle érigé et la distance entre le poteau de ligne de démarcation et ce poteau d'angle.

Jalonnement commun de claims contigus

12. (1) Si un titulaire de permis jalonne au sol deux claims contigus ou plus et qu'il présente une demande d'enregistrement des claims au même moment, il peut ériger des poteaux d'angle communs aux angles communs ou, le cas échéant, des poteaux indicateurs communs pour indiquer les angles communs, et des poteaux d'angle et de ligne de démarcation communs aux emplacements communs pour les poteaux d'angle et de ligne de démarcation.

(2) Si un poteau d'angle commun est érigé en vertu du paragraphe (1), l'étiquette, si des étiquettes métalliques sont utilisées, et les inscriptions requises à l'égard de chaque claim sont placées sur le côté du poteau d'angle commun qui fait face au poteau d'angle suivant pour ce claim, en procédant dans le sens des aiguilles d'une montre.

(3) Si un poteau indicateur commun est érigé en vertu du paragraphe (1), l'étiquette, si des étiquettes métalliques sont utilisées, et l'inscription relatives à chaque claim sont placées sur le côté du poteau indicateur commun qui fait face au poteau d'angle suivant pour ce claim, en procédant dans le sens des aiguilles d'une montre.

(4) Si un poteau de ligne de démarcation commun est érigé en vertu du paragraphe (1), l'étiquette, si des étiquettes métalliques sont utilisées, et les inscriptions requises à l'égard de chaque claim sont placées sur le côté du poteau de ligne de démarcation commun qui fait face au poteau d'angle suivant pour ce claim, en procédant dans le sens des aiguilles d'une montre.

(5) L'esquisse ou le plan compris dans la demande d'enregistrement des claims visée au paragraphe (1) indique l'emplacement des poteaux de claim communs.

Non-enregistrement du claim

13. Quiconque jalonne au sol un terrain ouvert au jalonnement sans présenter de demande d'enregistrement du claim dans le délai précisé au paragraphe 44 (1) de la Loi n'a pas le droit de faire enregistrer un claim sur le terrain ni de jalonner le terrain de nouveau, et le registrateur de claims peut refuser ou annuler le jalonnement.

Validité d'un claim jalonné de bonne foi

14. S'il semble qu'un titulaire de permis a essayé de bonne foi de se conformer à la Loi et au présent règlement, son claim jalonné au sol n'est pas rendu invalide pour l'un ou l'autre des motifs suivants :

- a) est incluse dans la superficie du claim une superficie qui n'a pas tout à fait la dimension applicable;
- b) le titulaire de permis n'a pas décrit ou indiqué exactement le secteur ou la parcelle de terrain faisant l'objet du jalonnement au sol dans sa demande d'enregistrement du claim ou dans l'esquisse ou le plan accompagnant la demande.

RÈGLES PARTICULIÈRES : TERRITOIRE NON SUBDIVISÉ

Claim situé dans un territoire non subdivisé

15. (1) Sous réserve des paragraphes (2) et (3), un claim situé dans un territoire non subdivisé est jalonné au sol de la manière suivante :

- a) il se compose d'une ou de plusieurs unités de claim;
- b) il couvre une superficie contiguë d'au moins 16 et d'au plus 256 hectares;
- c) ses limites ont seulement des directions astronomiques nord et sud et est et ouest;
- d) il est de forme carré ou rectangulaire.

(2) Un claim peut avoir une limite qui est commune à la limite d'un secteur non ouvert au jalonnement à condition que toutes les autres limites du claim soient jalonnées de manière à ce que le claim soit le plus conforme possible aux exigences énoncées au paragraphe (1).

(3) Une limite de claim peut changer de direction soit lorsqu'elle est commune à un terrain non ouvert au jalonnement, soit à l'intersection d'une limite de levé ou d'une limite de claim, à un poteau de claim ou à la borne d'un terrain adjacent ou d'une structure cantonale.

(4) Si un claim se compose de deux unités de claim ou plus, des poteaux de ligne de démarcation sont érigés le long du périmètre du claim à des intervalles de 400 mètres.

(5) La dimension d'un claim est, dans la mesure du possible, un multiple de 16 hectares, sauf si le claim comprend un secteur irrégulier visé à l'article 16.

(6) Les limites d'un claim sont mesurées horizontalement.

Exception : jalonnement d'un secteur irrégulier

16. (1) Un secteur irrégulier qui est adjacent à un terrain, submergé ou non, non ouvert au jalonnement peut être jalonné au sol avec des limites communes à ce terrain, si le claim est par ailleurs le plus conforme possible aux exigences énoncées à l'article 3, à l'exception de la disposition 2, et à l'article 15.

(2) Un secteur irrégulier submergé qui est adjacent à un terrain, submergé ou non, non ouvert au jalonnement peut être jalonné au sol avec des limites communes à ce terrain, si le claim est par ailleurs le plus conforme possible aux exigences énoncées à l'article 3, à l'exception de la disposition 2, et à l'article 15.

(3) Les limites d'un claim irrégulier jalonné en vertu du paragraphe (1) ou (2) sont indiquées en érigeant des poteaux de ligne de démarcation le long de celles-ci à des intervalles de 400 mètres.

(4) Malgré le paragraphe (3), l'érection de poteaux de ligne de démarcation n'est pas nécessaire le long d'une limite de claim irrégulier qui est une limite d'étendue d'eau.

(5) La limite d'un claim irrégulier jalonné au sol qui est une limite d'une étendue d'eau peut n'être indiquée que par l'érection de poteaux d'angle le long de la limite le plus près possible du croisement de la limite du claim et de la limite de l'étendue d'eau.

(6) La définition qui suit s'applique aux paragraphes (4) et (5).

«limite d'une étendue d'eau» S'entend du bord de l'eau, sauf définition contraire dans l'acte d'aliénation existant.

Application au territoire subdivisé désigné

17. Outre qu'ils s'appliquent au jalonnement au sol de claims situés dans un territoire non subdivisé, les articles 15 et 16 s'appliquent au jalonnement au sol de claims situés dans les secteurs d'un territoire subdivisé désignés par le ministre si, de l'avis de ce dernier, la structure de l'arpentage dans ces secteurs est tellement difficile à déterminer qu'il n'est pas raisonnable de s'attendre à ce que quiconque y jalonne un claim au sol puisse le faire conformément aux articles 18, 19 et 20.

RÈGLES PARTICULIÈRES : TERRITOIRE SUBDIVISÉ**Jalonnement au sol dans un territoire subdivisé**

18. (1) Les limites d'un claim jalonné au sol qui est situé dans un territoire subdivisé coïncident avec les lignes de rang, de concession, de lot ou de section établies au moment du levé primitif, ou y sont parallèles.

(2) Un claim jalonné au sol couvre une superficie d'au plus 256 hectares et a au moins la dimension minimale mentionnée au présent article.

(3) Un claim jalonné au sol a la forme d'un carré ou d'un rectangle.

(4) Un claim jalonné au sol peut avoir une limite qui est commune à la limite d'un secteur non ouvert au jalonnement à condition que toutes les autres limites du claim soient jalonnées de manière à ce que le claim soit le plus conforme possible aux exigences énoncées au présent article et à l'article 3, à l'exception de la disposition 2.

(5) Si un claim jalonné au sol se compose de deux unités de claim ou plus, des poteaux de ligne de démarcation sont érigés le long du périmètre du claim partout où l'angle d'un lot ou d'un lotissement d'une section se trouve sur le périmètre du claim.

(6) Lorsque des limites irrégulières existent, les poteaux de ligne de démarcation sont érigés pour indiquer les limites avec le plus de précision possible.

(7) Dans un canton subdivisé en lots de 40 hectares, un claim jalonné au sol de dimension minimale couvre une superficie de 20 hectares et occupe la moitié nord, sud, est ou ouest d'un lot.

(8) Dans un canton subdivisé en lots de 60 hectares, un claim jalonné au sol de dimension minimale couvre une superficie de 15 hectares et occupe le quart nord-est, nord-ouest, sud-est ou sud-ouest d'un lot.

(9) Dans un canton subdivisé en lots de 80 hectares, un claim jalonné au sol de dimension minimale couvre une superficie de 20 hectares et occupe le quart nord-est, nord-ouest, sud-est ou sud-ouest d'un lot.

(10) Dans un canton subdivisé en lots de 130 hectares, un claim jalonné au sol de dimension minimale occupe le quart nord-est, nord-ouest, sud-est ou sud-ouest de la moitié nord ou sud d'un lot.

(11) Dans un canton subdivisé en sections de 260 hectares subdivisées elles-mêmes en quarts de section ou en lotissements de 65 hectares chacun, un claim jalonné au sol de dimension minimale occupe le quart nord-est, nord-ouest, sud-est ou sud-ouest d'un quart de section ou d'un lotissement.

Exception

19. Un claim jalonné au sol qui est situé dans un territoire subdivisé n'a pas à se conformer à l'article 18 si les conditions suivantes sont réunies :

a) la conformité n'est pas possible pour l'un ou l'autre des motifs suivants :

- (i) le lot ou la subdivision d'une section d'un canton est de forme irrégulière,
 - (ii) le levé primitif, le lot ou la subdivision comporte une autre irrégularité;
- b) dans les circonstances, le jalonnement du claim est par ailleurs le plus conforme possible aux exigences de l'article 18.

Inclusion d'un terrain par ailleurs exclu d'un claim

20. Un terrain qui serait par ailleurs compris dans la superficie d'un lot ou d'un lotissement d'une section, mais qui en est exclu parce qu'il est immergé ou pour toute autre raison, peut être compris dans un claim jalonné au sol comme s'il faisait partie du lot ou du lotissement.

PARTIE II JALONNEMENT SUR CARTE DES CLAIMS

JALONNEMENT SUR CARTE DANS LE SUD DE L'ONTARIO

Jalonnement sur carte dans le Sud de l'Ontario

21. (1) Dans les territoires subdivisés du sud de l'Ontario, le jalonnement sur carte des claims est effectué conformément à la présente partie par référence à la structure d'arpentage existante.

(2) Dans les territoires non subdivisés du Sud de l'Ontario, les claims sont jalonnés au sol conformément à la partie III.

Interdiction : jalonnement au sol

22. Nul claim situé dans un territoire subdivisé du Sud de l'Ontario ne doit être jalonné au sol et nulle demande d'enregistrement d'un claim jalonné au sol dans le territoire ne doit être acceptée pour enregistrement à compter de la date à laquelle le jalonnement sur carte des claims commence à s'appliquer au territoire.

Territoire exclu du jalonnement sur carte

23. (1) Un claim qui est jalonné sur carte ne doit pas comprendre de terrain situé dans un territoire où le jalonnement sur carte n'est pas permis.
